

Security management command & control

AppVision

The latest technology in integrated building and security management software

Access control

AppVision Building Manager is a fully functioning building management application that incorporates the various protocols used in modern building security as well as building automation. Users can easily see all managed events taking place at once using a network of workstations over IP.

With no conflict of interest and total independence from equipment manufacturers we have the freedom to integrate new system drivers and features as required by our clients.

CCTV command and control

Our software application, AppVision is a graphic user interface that centralises the command and control of all different types and makes of security equipment as well as any building management. AppVision uses the latest Microsoft programming technology for added flexibility and reliability.

Intruder and fire alarm centralisation

AppVision is configured to meet the needs of command and control rooms where it is important to maintain high levels of visibility from all building management equipment. This may also be incorporated with integrated security systems.

Integrated Security

Prysm Software is a specialist in multi protocol security management applications. We have over 11 years of experience in managing fully integrated security systems. Our security application, AppVision.NET, is used worldwide by major electronic security companies.

With hundreds of high profile deployments, AppVision.NET, is a tried and trusted integrated security application that manages equipment used in the security and building management industry : cctv, access control, fire and intruder alarms, perimeter detection, public address / emergency sound, emergency fire doors and emergency lighting systems.....

Look at our web site for case studies.

AppVision Building Manager makes it easy for you to centralise the control of any HVAC systems : heating, ventilating, air conditioning as well as boilers. Simply enter the desired temperatures or humidity levels for each zone and AppVision will manage the commands for each equipment. In fact, the application is limited only by your choice of HVAC equipment and your imagination.

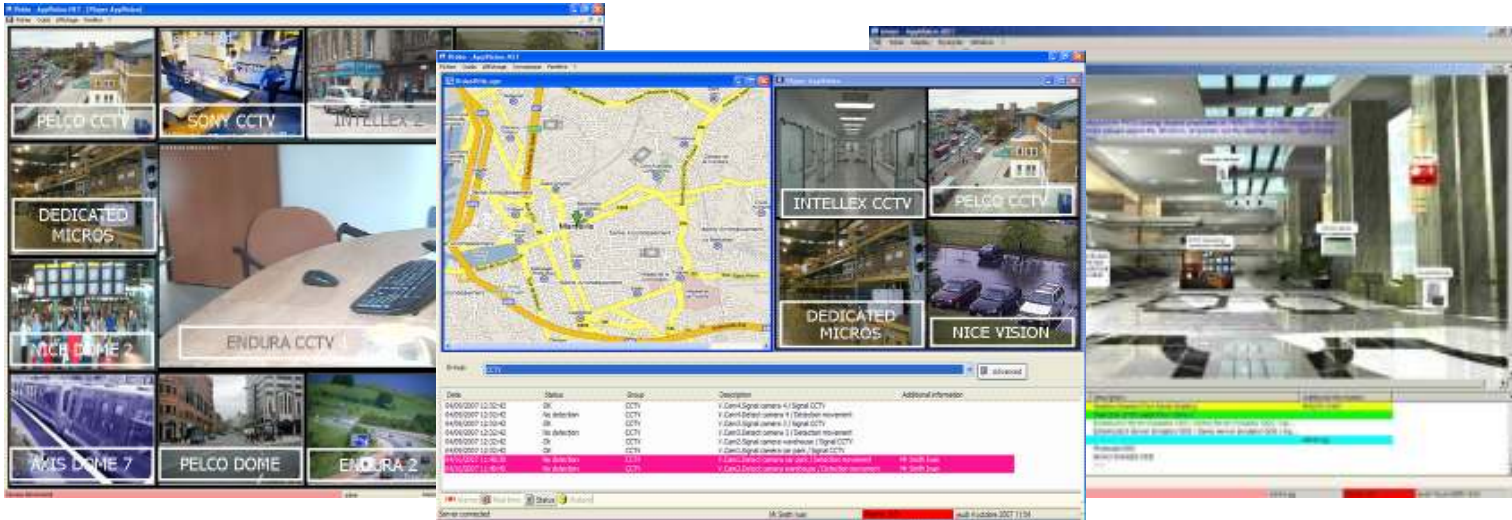

Installing AppVision Building Manager saves you time and money as well as improves your environment.

Lighting & Energy

Integrating the control of your building lighting and energy consumption with AppVision Building Manager can save you time and money. Inefficient lighting systems and poor management of lighting controls costs your organisation a great deal of money as well as a hidden environmental cost.

Command and control of all building security equipment

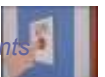

Manage from a single pc or with your IP network :

- Security control centres
- Monitors and matrices
- Cameras, DVR's & NVR's for cctv surveillance
- Fire alarm systems
- Intruder alarm systems
- Access control systems
- Technical alarms: levels, quality, limits, equipment status, debits, consumption.....
- HVAC : heating, lighting, air condition.....,

Plus many other equipment systems

- ✓ Application for Windows 98, NT, 2000, XP
- ✓ Facilitates interactivity of multiple system types and brands (multi – protocol)
- ✓ Management of user and group access rights
- ✓ Multi workstation for installations over IP networks which can also
- ✓ Very easy to set up and use
- ✓ Manage the full range of security equipment remotely from a PC
- ✓ Web browser access via Internet as well as alerts by SMS, email
- ✓ Ready to deploy versions for specific equipment are available
- ✓ Animated on screen graphics for plans of building / site / town as well as alarms management, archives and alarm events
- ✓ Dynamic modification of parameters and programming of security equipment via the on screen icon
- ✓ Unifies intrusion and fire detection systems, access control systems, CCTV systems, technical alarms and technical building management into one complete and integrated system
- ✓ Contains an access control module which can connect to most makes of access control badge readers and systems
- ✓ Multi language
- ✓ Works with normal PC monitors, touch screen monitors and security control room monitors
- ✓ Import images in 3D or 2D
- ✓ Shows statistics and graphs for monitored equipment systems and users
